"Again and again, we set the trend by producing bold designs, thought out down to the last detail"

Welcome to the new era

Modular understands how much consumers value good lighting, design and technology. By consistently inventing clever, eye-catching and energy-friendly lighting solutions, we are constantly pushing the boundaries of architectural lighting. Again and again, we set the trend by producing bold designs, thought out down to the last detail.

Today we bring you our new 2011 designs. A broad array of revolutionary high-end architectural lighting fixtures, all created around the same goal: to enrich spatial architecture with a green touch. The light sources used, from LED to fluorescence, are energy efficient and perfectly incorporated into the fixtures.

Discover and enjoy the new designs in our 2011 collection.

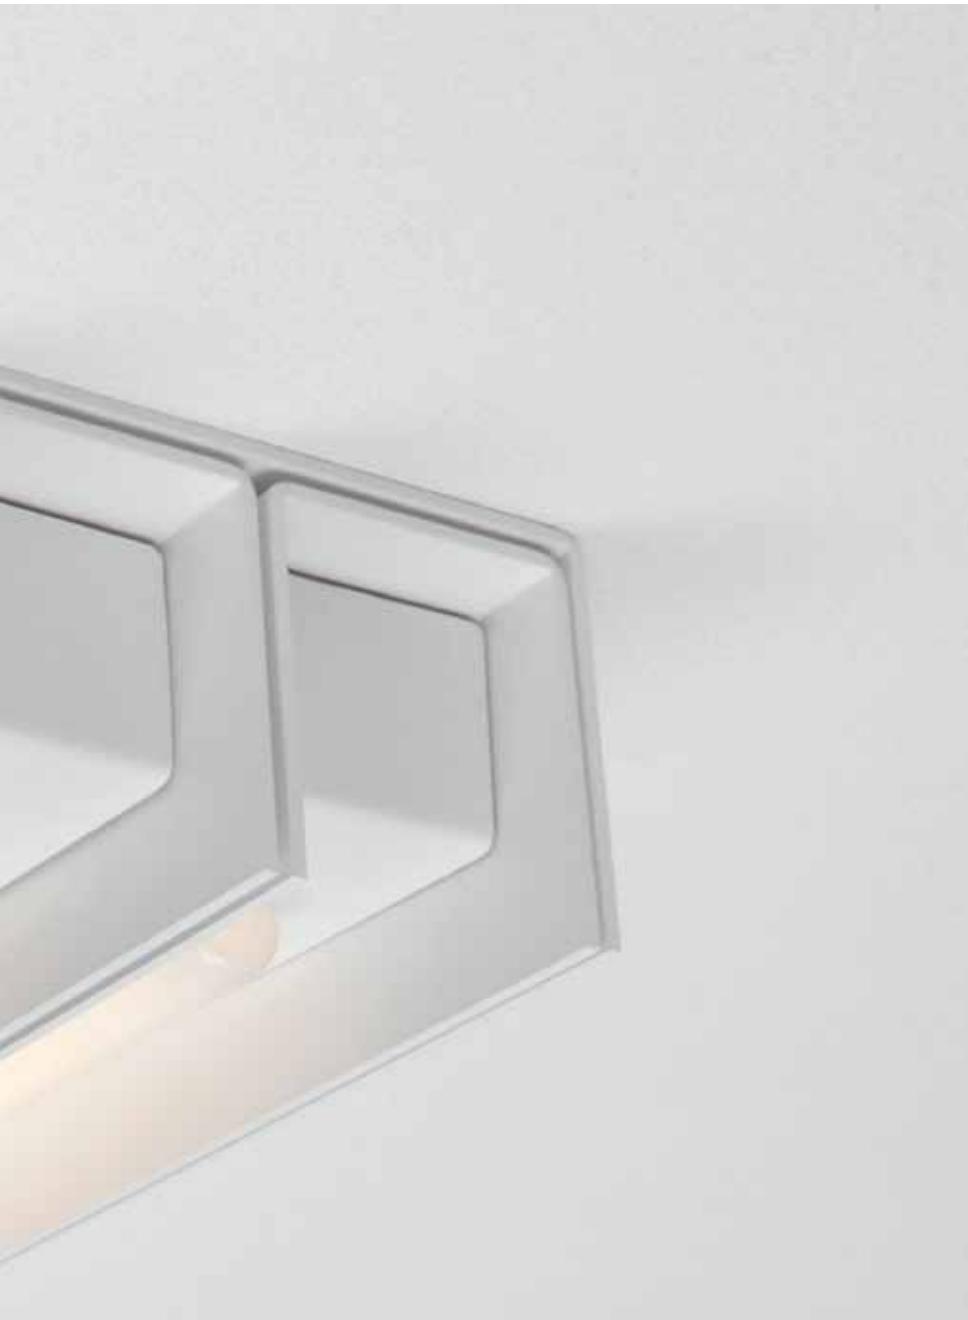

UNITED

TL-LIGHTING AS STYLE ICON

Following the very successful launch of 'Square Moon' which managed to make fluorescent lighting trendy again in the architectural world, Modular has once more pulled out all the stops with United. This time though, instead of hiding behind a diffuser, the lamps are stripped of any artifice, baring themselves completely in their slim aluminum housing.

ROWS OF PURITY

In simple terms, United is a naked 'seamless' TL lamp in a powder coated aluminum housing – designed in cooperation with Couvreur-Devos. It is precisely that plain simplicity that makes it so special. To start with, the exposed lamps ensure higher efficiency, thus reducing power consumption. That efficiency can be increased even further when selecting a white interior to amplify light reflection. United consists of one or more U-profiles, which are available with or without a cover. The covers are available in white or black structure, combined with a white structure or matt black lining, thereby offering four different color combinations.

United comes in three different lengths according to different type of lamps and is 1-10V or Dali/Pushdim dimmable. An IP55 version is also available for use outdoors or in the bathroom. Installing several modules in a linear design, or alongside each other, creates a repetitive effect with handsome results.

United Asy creates an asymmetrical light beam that results in a homogeneous wall wash effect.

RAY OF LIGHT

Whether on a ceiling or wall, in the hallway, office or shop, outdoors over the entrance, in the bathroom – on either side of the mirror –, or as general lighting, the possible uses for United are limitless. Even though United does not feature a diffuser, if mounted properly, that is pointing in the right direction, it won't dazzle or cause glare off screens.

Anyone who believes fluorescent lights cannot create a cozy look should definitely rethink their view. United is the ultimate tribute to the fluorescent tube lamp. It radiates a warm, white color and is a welcome sight, in either white or black.

FLAT MOON

THE MOON AS AN ARCHITECTURAL OBJECT

Like an enchanting and atmospheric full moon, Flat Moon shines its uniform light into the room. Characterized by great lighting performance and elegance, this easy-to-fit ceiling fixture with its integrated ballast definitely has a lot of appeal.

CATCH THE MOONLIGHT

Under its aluminium housing, in black or white structure, Flat Moon conceals a set of dimmable, low-energy fluorescent lamps and the necessary ballast unit. It can be suspended or mounted in the ceiling.

When suspended, Flat Moon acts as both an up & down-lighter. As a mounted luminaire, it can be placed directly against the ceiling, or by leaving a space between the ceiling and lamp for additional indirect lighting effect. The recessed version is worked fully into the ceiling.

DISCRETE ILLUMINATOR

Thanks to its high lighting performance and discrete appearance, Flat Moon fits in well in offices, hospitals and public spaces, as well as in shops and private residences. It can be used as a direct down-lighter or as an up & down-lighter. In the latter setup, it provides a handy combination of indirect and direct lighting.

The circle, the purest geometric shape, turns the versatile Flat Moon into a simple, basic lighting element, which supplies uniform, subdued light to large surface areas. A lamp that bathes your interior spaces in a diffused white light, like a full moon shining in the heavens.

flat moon suspended

SOUFFLE

A PIECE OF CAKE

Organic forms do not always come from nature. After delighting us with its mouthwatering "Cake" luminaire, Modular now introduces the Soufflé, a light dish this time.

DELICIOUS STYLEMAKER

Soufflé's fluorescent lamps produce a diffuse light with a particularly pleasing effect. This look can be enhanced even further by using the color filter. The poly down model shines light directly downwards, while the poly up/down version creates a nice soft upwards and downwards light beam.

The interior of the dimmable lamp is white structure and there is a choice of glossy white or glossy black for the exterior finish. The fixture can be either suspended or surface mounted.

LIGHT AND ETHEREAL

Soufflé looks particularly attractive against the ceiling, and can also be suspended. An ideal feature above the dining table or the cooking range, in the lobby of a hotel or restaurant, or at the store checkout.

With its amorphous shape reminiscent of a ring-shaped cake, Soufflé bears the signature Modular look. It allows the lamp to shine from the depths as it were, creating a unique ambience and giving the Soufflé a mystical character. Its high level of coziness promises to make Soufflé a hit.

soufflé suspended

OLIV

THE PERFECT SPHERE FOR THE OUTDOORS

Oliv is a discrete, functional lighting fixture with a subtle outer ridge and recessed lighting source. A must-have in the outdoor lighting collection.

NIGHT SHAPER

The state of the art dimmable LED module with its high quality reflector is surrounded by a white or black structure housing. When mounted in a ceiling, the subtle outer ridge of the Oliv helps shield the light source from the eye, making it look even more recessed. The flood version of the light source creates a broad lighting beam and is also available in warm or ice white.

Thanks to the IP67 rating, its compact build-in size and efficient luminous output, Oliv is perfectly suited for penthouses, residential and professional spas and pool houses.

The recessed light source of the Oliv combined with its subtle outer ridge contribute to create a soft lighting experience, for summer evenings at the pool or the ultimate relaxation at the spa.
