

# Sushi Alucompact® DEPTH 80

Designed by Bartoli Studio

Extending or fixed table with an anodised aluminium structure and Alucompact® layered laminate tops. Alucompact® is a laminate that has been layered at a high temperature by adding sheets of aluminium in the layering phase that give it a strong structural stability. The extending mechanism with two or three extensions makes it possible to easily increase the length of the top while maintaining excellent sturdiness.

## Leg finish:

Anodised aluminium

Aluminium with white lacquer

Aluminium with anthracite grey lacquer

Aluminium with black lacquer

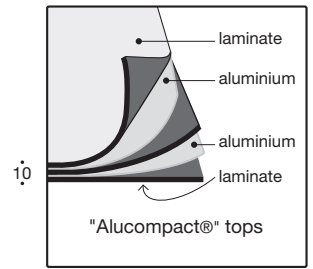

## Finish of top/extensions:

White laminate

Grey laminate

Anthracite grey laminate

Black laminate

**+** It is possible to add a third extension to articles 01SUS03 (increasing the length to 33 cm).

**☺** Tables that extend to more than 250 cm have a top that slightly bends, which complies with accepted quality standards.

# Sushi Honeycomb

Designed by Bartoli Studio

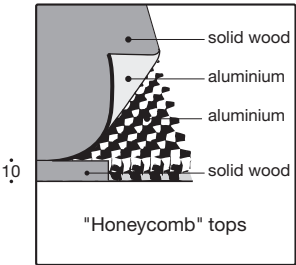

Extending or fixed table with an anodised aluminium structure and honeycomb tops. By observing a cross-section of the top one can see that it is composed of a honeycombed aluminium structure. These modern panels are used to construct aeroplane nacelles and are both lightweight and very resistant to flexion and compression, despite the fact that they are "air-filled". Also available in uni-colour option.

**Leg finish:**

- Anodised aluminium
- Aluminium with wengé lacquer
- Aluminium with grey oak lacquer

**Finish of top:**

- Oak
- Wengé stained Oak
- Grey Oak

Tables that extend to more than 250 cm have a top that slightly bends, which complies with accepted quality standards.

**Extensible (↔)**
